EDUCATION

Bachelor of Technology (B.Tech)
Computer Science & Engineering
Rai University - [Ongoing]
CGPA: 8.70

LANGUAGES

- English
- Marathi- Native
- Hindi

HACKATHON & TEAM PROJECTS

AI Career Coach Platform:

Developed an AI-powered career platform with resume building, analysis, roadmap generation, and cover letter tools for students.

GearGuard:

Developed GearGuard, a maintenance management system with asset tracking, automated technician workflows, Kanban scheduling, and reporting dashboards to improve maintenance efficiency.

AI Video Testimonial Platform:

Built an AI Video Testimonial Platform enabling automated testimonial collection, AI interview processing, video management, and sentiment-driven insights for streamlined customer feedback workflows.

PROJECTS

Noble's Bid:

- Developed a real-time online auction platform using the MERN stack with role-based access control, secure JWT authentication, and scalable backend APIs.
- Developed features including live bidding, auction automation, payment verification, admin dashboard, email notifications, and a responsive UI with React, Redux Toolkit, Tailwind CSS, and MongoDB.

Growwise:

- Developed a real-time stock market application using Next.js with live price updates, advanced search, interactive charts, and secure authentication with personalized watchlists and alerts.
- Developed AI-powered insights, financial news summaries, and automated workflows using Inngest to enhance user decision-making and application performance.

CyberDash:

- Developed CyberDash, a React Native mobile game with infinite runner mechanics, level-based progression, power-ups, and responsive cross-device gameplay.
- Developed core systems including collision detection, performance optimization, and Android APK deployment using Expo.

FocusFuze - Open Source Contribution:

- Contributed to FocusFuze (open-source) by enhancing the Video Note-Taking module with search, sorting, and improved note management features.
- Improved UI/UX by updating Note.jsx and Note.css, optimizing readability, styling, and overall user experience for better productivity and collaboration.

UI/UX DESIGN & IOT:

Salon Booking Application:

Designed a Salon Booking Application in Figma with user flows and responsive UI for appointment booking, service exploration, and product purchasing.

Growwise:

Designed Growwise in Figma, creating wireframes, interactive prototypes, and responsive UI/UX for a goal-focused productivity and collaboration platform.

Smart Car Wiper System - Arduino Project:

Built an Arduino Uno-based Smart Car Wiper System with rain sensing and automatic servo-driven wiper control to enhance driving safety and visibility.
